

WiFi Smart Irrigation Controllers

Approved by Mother Nature

Take control of your irrigation at any time!

Control your irrigation system from your iPad, iPhone or Android at any time from anywhere in the world! HydraWise saves water intelligently adjusting your sprinkler's watering schedule to suit your local weather conditions. No more wasted water. No more dead plants.

Save Time

Use your iPhone, Android device or web browser to access our easy-to-use interface. You decide how much water your garden needs and HydraWise will take care of the rest.

Access from anywhere.

Save Money

Automatically adjust your watering depending on local weather conditions. Experience a 40% average water saving compared to a controller with a fixed schedule.

Save on water costs.

Save your Plants

Let your garden thrive without wasting precious water. HydraWise waters more when it's dry and less when it's wet, so your plants always have the right amount of water.

More green, less water.

“Since we installed our Hydrowise Irrigation Controller our water bill has gone from \$137 a month down to \$74 in the hottest part of the summer here in Las Vegas. This is the lowest it has ever been in the past 15 years for summer watering. Thank you so much for providing a great product with such super support and user friendly management of our system.” **Darlene, Las Vegas, USA**

Easy to Use

Simple and straight forward installation. New controller setup wizard. Dashboard control from smart phone, Tablet and PC apps. Touch screen interface on the controller.

Save Water

Uses weather station information and localized forecasts to predict, change, monitor, measure and report on your irrigation.

Remote Management

Access anytime via phone, tablet or computer. Contractor management access via their own login.

Water Restriction Compliant

Complies with all known water restrictions.

Uncover your Water Usage

Detect broken pipes, spray heads and faulty wiring or valves. View the water usage for each watering cycle with a flow meter. Discover when a zone's water usage is abnormal. Don't lose plants or get massive water bills just because your irrigation system failed you!

Home Owner Features

- Smart Watering based on local weather conditions with Predictive Watering™ adjustments
- Time based with Predictive Watering™ based on forecast temperature, rainfall, humidity and wind speed
- Free access to airport-based weather stations for local weather conditions
- Store pictures with each zone
- In App and Browser based alerts

Contractor Features

- Remote access to thousands of customer controllers from your account
- Store irrigation and landscape designs online
- View customer alerts online for remote troubleshooting

Optional Extras

- SMS alert notifications
- Follow up to four additional weather stations for hyper-accurate weather information
- Expand your 12 zone controller up to 36 zones

Specifications

Controller

- 6 and 12 zone models
- Indoor / Outdoor models
- Master Valve support using zone output
- Short circuit protection (800mA max)
- Multiple sensor inputs for flow, rain, soil, water level
- Output standard 24V AC solenoids with up to two solenoids per zone
- Operating temperature range 0°F to 150°F (-18°C to 66°C) Humidity 0 to 95% non-condensing
- Humidity - 0 to 95% non-condensing
- 12 zone model includes broken wiring detection and is expandable to 36 zones

Physical	Indoor	Outdoor
Width	7"/170mm	11.2"/285mm
Height	6"/150mm	8"/202mm
Depth	1.3"/35mm	3.1"/80mm

Certifications

- Wi-Fi Alliance certified
- FCC (US), CE (Europe) and C-tick (Australia) approved

Internet connectivity

- Remote control via iPhone/Android apps or web browser
- Integrated Wi-Fi (802.11b/g) connects to standard wireless router
- Multiple controllers per account
- Push (in app) notifications for issues

Programmed runs

- Day of week, odd/even day watering with dedicated start times per zone
- User selected internet weather stations for climate sensing

Automatic scheduling

- Time based with Predictive Watering based on forecast temperature, rainfall, humidity and wind speed
- Smart Watering based on Evapotranspiration with Predictive Watering adjustments

Flow Meter Functionality (Optional)

- Per zone overflow and underflow alerts
- Full reporting on water usage in litres/gallons per irrigation zone
